## I. INTRODUCTION

- Due to the growing popularity of movies, younger audiences increasingly opt to explore various websites for their **film-viewing** needs **instead of** going to **traditional theaters**. This shift is driven by the convenience of choosing movie genres and flexible viewing times. As a result, our goal is to develop a project that caters to a broad spectrum of people, ensuring their satisfaction.
- The project aims to develop a streaming platform under the brand name "**CineClick**" that provides an alternative to existing services like **Netflix**. The primary motivation behind this project is to offer a user-centric, content-rich, and cost-effective platform for streaming a wide range of movies and TV shows.
- "**CineClick**" will cater to users looking for diverse content and a seamless streaming experience.

## II. TARGET USERS AND ENVIRONMENT

### 1. *Target Users*

- **"CineClick"** is designed to serve a broad audience of streaming enthusiasts, including:
    - Casual viewers who enjoy popular movies and TV series.
    - Film buffs and TV show aficionados.
    - Families seeking a safe and diverse entertainment option.
- => **Users of all age groups.**

### 2. *Environment*

- "CineClick" will be accessible across various environments and devices.
- **Web:** Desktop and laptop users, on various browsers (Chrome, Firefox, Safari, etc.).

-

### III. KEY FEATURES

- "CineClick" will offer a range of key features to enhance the user experience and differentiate itself in the competitive streaming market. These features include:
- **User actors**
