Sprint 1: Planning review

-04/11/2023-

1. Team members present:

- Phạm Hoàng Gia Huy
- Trương Công Gia Phát
- Đặng Vĩnh Tường
- Trần Thái Toàn

2. What went well?

- We have completed our tasks this sprint.
- Coordination between team members is very pleasant.
- Software Development Plan provides us a clear and forward direction in which we can develop the software efficiently.
- Vision Document helps us deepen our understanding of the project, by writing it we understand what needs to be done and why it is needed.

3. What problems and what caused the problem?

- Nowadays, there are a lot of choices for programming languages, frameworks, databases to develop an application, each has its own pros and cons which make it harder for us to decide which we should use.
- Our inexperience in software development process makes it difficult to complete our Software Development Plan and Vision Document.
- Time spans for tasks were not very well decided and also caused some problems.

4. What to improve?

- Decide time spans for each task more convenient for the schedule of the assigned members.

5. What lesson did we learn?

- We have learned how to collect, analyze, and define high-level needs and features of the project by writing a Vision Document.
- Through writing a Software Development Plan, we learned how to plan out the development process in a more professional way.
- After finding and analyzing various choices of languages, frameworks we know more about current popular tools for software development.
