2. What have we done since last week?

- Revise project plan and vision document:
  + Fix all issues found by TA's, make them clearer and more accurate.
- Finish use case diagram as well as use cases specification:

3. What will we do until next week?

- All team members start learning and researching (languages, frameworks, …) to complete the project.

4. What issues / problems /obstacles do we have?

- Because of misunderstandings when we draw the use case diagram, we waste a little more time than expected to complete the use case diagram and use cases specification.
